

SMART LINK

WIRELESS VEHICLE MONITORING SYSTEM

Smart Link is a **Bluetooth module** installed on board your golf car and paired with the Smart Link app to provide insights into the vehicle's battery system like **state of charge** and **state of health**.

The Smart Link app can be connected during vehicle use to provide **dashboard data**, as well as an optional **wireless lockout**, or only connected periodically to download new history records and send them via email or use the real-time diagnostics to help **troubleshoot vehicle issues**.

Bluetooth App compatible with iPhone and Android devices
